Recruiter

Addepar

Dear Hiring Team Manger:

I am applying for the Software Engineering Internship for summer 2022, that was posted with Handshake this last week. Based on the requirements for the position, it fits very well with my education and interests.

I am currently pursuing my B.S. Degree in Computer Science with an anticipated graduation date of May 2023. I have taken various sophomore and junior software engineering courses and have a strong understanding of coding with various languages and programming best practices. I have been gaining experience with MySQL and networking socket programming since 2020, by working on various school and personal projects for both web and client applications. While I am gaining good experience as a student at the University of Utah, an internship with Addepar will help me to become fully immersed in an engineering environment and learn more about working on large scale projects with a skilled team.

Please find my attached resume with additional information about my education, skills, and personal projects. I would appreciate the opportunity to discuss my qualifications for the internship more fully in an interview. I can be reached at (801)608-3517 or by email at: rvreeke123@gmail.com. Thank you for your consideration and I look forward to talking with you soon.

Sincerely,

Ryan J. Vreeke
